## PACKAGING

Aware of the impact that the packaging and presentation of your items have when garments arrive at your customers' premises, we adapt to your specifications and do everything in our power to guarantee that your deliveries are impeccably presented.

- Presentation on hangers and in covers.
- Application of logos, size tags and composition labels.
- Folding and packing in bags.
- Automatic shirt folding.
- Presentation of items in your own packaging.
- Supply of packaging materials.

## LABELLING

We adapt to your needs and constraints, to guarantee reliable and attractive labelling of your clothes, shoes, fashion accessories, cosmetics, eyewear, luggage, etc.

From a simple sticker to an anti-theft label or sew-on RFID label, we will meet your expectations and comply with your specifications.

## IRONING & CREASING

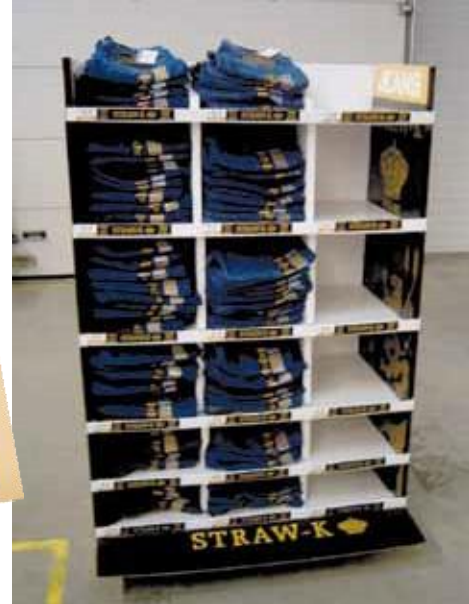

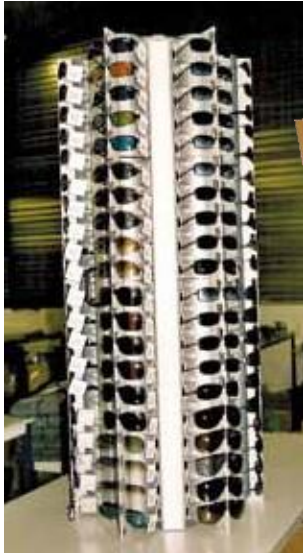

Owing to the diversity of our professional equipment and our team's expertise, we are able to process all types of garments.

- Steam ironing on vacuum tables (12 stations).
- Steam mannequins.
- Toppers.
- Steam brushes to remove traces of lustring.
- Creasing tunnel, with a capacity of 1,000 items per hour.

## DISPLAY

We create your gift boxes and promotional materials, prepare and fill display stands and directly organise deliveries to shops.

## CUSTOMISATION

We customise your clothes: badges, patches and brand logos, etc., and can carry out all types of alterations to adjust garments to the wearer (trouser bottoms, shirt sleeves, hem alterations, etc.).

## MUCH MORE THAN JUST LOGISTICS

Our operational team of experts from the clothing industry and our regular investments in equipment are in line with the needs and challenges of players in the fashion world.

We are able to receive and process your items under customs control.

## QUALITY INSPECTION AND SORTING

Our technicians, who have extensive experience in the clothing industry, examine and inspect your items in accordance with your specifications and quality standards. They:

- Look for fabric and stitching defects.
- Check for stains.
- Inspect measurements.
- Sort garments.

## SEWING REPAIRS

Our experienced seamstresses will find the best solution to repair and alter your items. To this end, we have a comprehensive range of sewing machines:

- Flat machine.
- Overlock machine.
- Invisible stitch hemming machine.
- Serger.
- Bartack.
- Cover stitch.
- Application of rivets and fasteners.
- Application of buttons.
- Buttonhole machine.
- Manual alterations.

## WASHING, STAIN REMOVAL AND AIRING

Depending on complexity, we offer several types of treatment:

- Airing to remove odours.
- Stain removal to get rid of isolated stains.  
This is performed manually, primarily on shoes with mould marks.
- Stain removal at the stain removal stations on textiles, for garments with isolated stains.
- Washing for both stain removal and dye fixing and bleeding issues.

During the finishing phase, after drying, we complete the service with ironing or creasing, either in the tunnel or on a mannequin.

Our latest-generation machinery, with a capacity of 1,000 items per day, offers effective and environmentally-friendly solutions.

## LABEL CORRECTION

Printing and application of all types of labels: composition, care instructions, price change, "Made in", RFID tags, etc.

- Stickers.
- Satin stickers.
- Swift labels.
- Labels applied with a tamper-proof sealed cord.
- Cardboard labels, sewn with lockstitch.
- Sewn composition labels.

## LOGISTICS TO PLATFORMS AND WAREHOUSES

We carry out deliveries on your behalf to all brand distribution platforms.

We pack items in packages, labelled according to customers' specifications, on film-wrapped pallets. If required, they are delivered on hangers, or in individual covers or covers containing several garments.

We take care of liaising with the warehouse, organising and tracking transportation, as well as writing up the packing list, in accordance with the the warehouse's specifications.

## LOGISTICS TO SHOPS

Delivery to warehouse or shop: your items are carefully stored in lockers according to reference, colour and size. Items on hangers are stored on bars.

We take the quantities requested for the preparation of your orders and produce delivery and parcel identification slips,

## E-COMMERCE LOGISTICS

Complete turnkey solution to manage your website:

- Reception of your goods.
- Goods picking.
- Preparation of orders and delivery of packages to the carrier.
- Updating your stock and managing any returns.
- Procurement of supplies (particularly in terms of packaging).
- Organisation of transport.
- File transmission directly to your site - no data entry required.

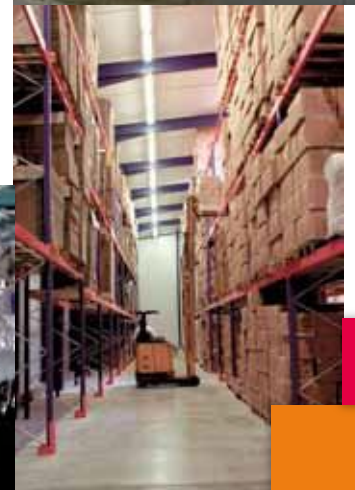

## STORAGE

Our warehouse, adapted to the demands of the ready-to-wear sector, strictly complies to APSAD safety standards (fire and intrusion).

Our storage capacity:

- In pallets up to 1,500 pallets store
- On hangers (approximately 50,000 items).

We are able to store your goods under customs control.

## REVERSE LOGISTICS

We receive and/or organise the collection and transportation of items points of sale.

We count the quantities received according to reference, size and colour. If required, we carry out a quality inspection of the items and repackage and label them.

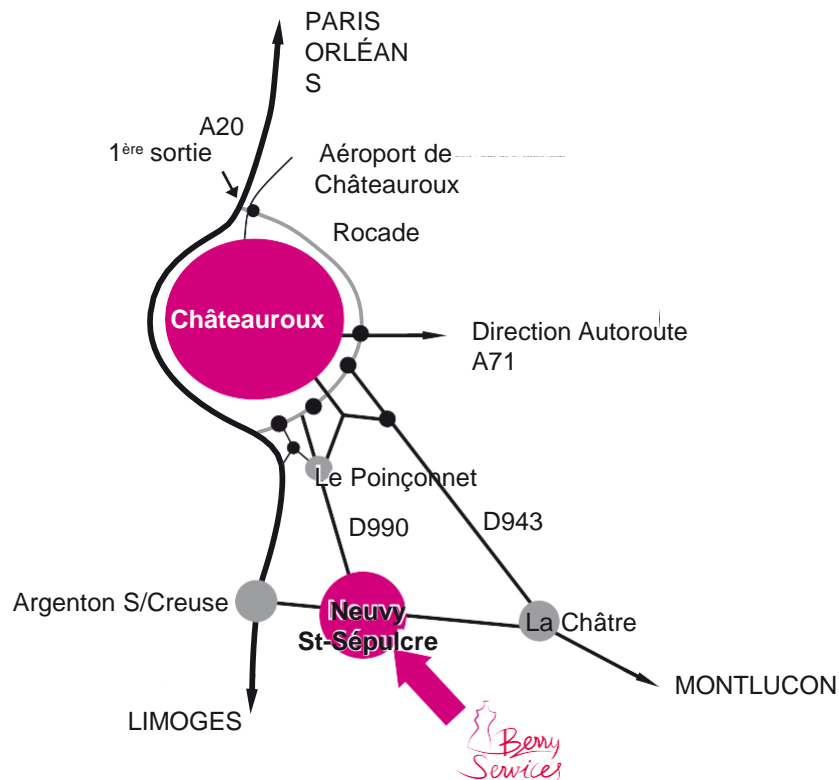

We draw up a detailed list of your return delivery, and your items are then ready to be re-delivered to the network of your choice.
